

The Bridge Press Process

seven steps to independent-publishing

Step 1

Discovery Session

During the Discovery Session, we'll assess the merits of your proposed book. A great idea is just that, until further explored.

Step 2

Concept Development

Now that we've confirmed the book idea to be feasible, we'll take the deep dive to develop the concept within its genre.

Step 3

Book Outline

At this step in the book development process, we'll outline the book by developing a table of contents and diagrams.

Step 4

Manuscript Development

Now you're ready to write. Using the book outline and supporting materials, you'll draft the manuscript for publication.

Step 5

Editing Process

Moving from book idea to completed manuscript is a huge accomplishment. Editing will ensure it's ready for production.

Step 6

Book Design

We will now determine the formats (hardcover, paperback, and/or e-book) and design the book's cover and interior.

Step 7

Book Production

All final files will be uploaded to the printer. A sample book is produced for review and final approval before mass production.
